1. Uvod

1.1 Korišćeni programski jezici

Za izradu sajta korišćene su sledeće tehnologije:

1) ***Bootstrap v4.5*** *– besplatni web framework otvorenog koda namenjen za kreiranje web sajtova i web aplikacija, baziran na HTML i CSS šablonima,*
2) ***CSS*** *(Cascading Style Sheets) – jezik formatiranja pomoću kog se definiše izgled elemenata web stranice,*
3) ***HTML*** *(HyperText Markup Language) – opisni jezik specijalno namenjen opisu web stranica,*
4) ***JavaScript*** *– dinamičan, slabo tipiziran i interpretiran programski jezik višeg nivoa,*
5) ***jQuery*** *– višeplatformska JavaScript biblioteka,*
6) ***jQuery Plugin*** *– metod koji se koristi za proširenje jQuery prototipa objekta,*
7) ***XML*** *(Extensible Markup Language) – standardni skup pravila za definisanje formata podataka u elektronskoj formi.*

Svi navedeni jezici, biblioteke i framework-ovi pisani su unutar „Visual Studio Code“ okruženja.

1.2 Opis funkcionalnosti

- *Kratka animacija prilikom učitavanja web stranice, nakon koje korisnik nesmetano može da pregleda web stranicu i izvršava različite zahteve.*
- *Progress bar u podnožju prozora uređaja koji grafički prikazuje koji procenat pregledanog sadržaja web stranice.*
- *Dinamički kreirano zaglavlje web stranice (logo i navigacioni meni) uz dodatne funkcionalnosti prilikom scroll-ovanja web stranice: promena stanja aktivnog linka kada se dođe do odgovarajuće glavne sekcije, kao i promena izgleda samog zaglavlja.*
- *Dinamički kreiran slider od 3 elementa, uz dodeljene sledeće funkcionalnosti: (1) automatska promena sadržaja na svakih 5 sekundi koja se zaustavlja onoliko dugo koliko se kursor miša nalazi na samom elementu i (2) promena sadržaja u skladu sa klikom na odgovarajuću strelicu: prethodni element (‹), sledeći element (›).*
- *Dinamički ispisana sekcija sa 2 tekstualna elementa i 4 elementa sa pozadinskom slikom. Svakom elementu sa pozadinskom sikom dodeljena je jednostavna zoom animacija koja se aktivira prelaskom kursora miša preko samog elementa.*
- *Dinamički ispisana sekcija „About Moolen’s“ uz dodatnu funkcionalnost prikazivanja (klikom na tekst „Our Story“) i zatvaranja modala (klikom na ikonicu ×).*
- *Dinamički kreirana galerija slika u kojoj je po default-u proširen prvi element i prikazan njegov sadržaj, dok su ostali elementi skupljeni. Svakom elementu je dodeljena mogućnost promene prelaksom kursora miša preko samog elementa, kada on postaje aktivni (prošireni) element. Onog trenutka kada kursor miša izađe iz*

okvira sekcije „Galley“, sekcija se vraća u svoj podrazumevani izgled (prvi element proširen, dok su ostali skupljeni). Funkcionalnost je prilagođena za dve prelomne tačke: (min-width: 900px) i (max-width: 899px).

- *Dinamički ispisana sekcija „Services“.*

- *Dinamički ispisana sekcija sa automatskim brojačima. U okviru svakog brojača, elementu koji u svom value atributu čuva informaciju o broju koji treba da se ispiše, dodeljena je animacija automatskog inkrementiranja za određenu vrednost. Onog trenutka kada korisnik dođe do tačke gde je sekcija u vidnom polju, sve animacije se aktiviraju i izvršavaju istovremeno.*

- *Dinamički kreirana kontakt forma koja sadrži sledeće elemente: polje za ime i prezime, polje za e-mail adresu, drop down listu, polje za datum, polje za vreme, polje za unos poruke i dugme za submit-ovanje. Obazezna su sledeća polja: polje za ime i prezime, polje za e-mail adresu i polje za unos poruke.*

  Ukoliko korisnik želi da zakaže posetu nekoj od preporučenih prodavnica ili pak zakaže razgovor može iz opcione drop down liste izabrati najbliži objekat, nakon čega se otvara mogućnost izbora datuma. Kada korisnik izabere datum, otvara se mogućnost biranja termina. Jednom kada korisnik izabere neku stavku iz drop down liste, sva polja se smatraju obaveznim, u suprotnom obavezna su samo gore napomenuta polja.

  Nakon promene stanja polja, korisniku se ispisuje poruka da li je uneti sadržaj ispravno formatiran ili ne. Za ime i prezime, kao i za e-mail adresu format se proverava na osnovu regularnog izraza, dok se za poruku smatra da je polje ispravno popunjeno ukoliko je unet bar jedan karakter. Polja za datum i vreme validiraju se u zavisnosti od radnih dana i ranih sati objekata.

  Ukoliko je korisnik popunio bar polje za datum, a potom promeni izbor opcije iz padajuće liste, tada se izabrane vrednosti u poljima za datum i vreme poništavaju i polje za vreme opet postaje nedostupno za unos dok korisnik ne izabere datum. Ukoliko korisnik pak izabere nultu opciju tj. podrazumevani tekst oba polja postaju nedostupna za unos.

  Ukoliko korisnik želi da submit-uje formu koja nije ispravno popunjena, taj zahtev će se odbiti tj. ništa se neće dogoditi. Ukoliko korisnik submit-uje praznu formu, to takođe neće biti moguće, ali u ovom slučaju neće biti prikazane greške (prikazuju se samo kada se stanje nekog polja promeni, a u kontekstu punog termina tek nakon sto se i polje za datum i polje za vreme popune).

- *Dinamički ispisano podnožje web stranice.*

- *Dugme za povratak na vrh web stranice je urađeno preko jQuery Plugin-a.*

1.3 Template

Za izradu sajta, nije korišćeno gotovo rešenje, kao ni „template“. Sajt je prilagođen za sve vrste uređaja!

2. Organizacija

2.1 Organizaciona šema

Sajt je single page sa mogućnošću redirekcije na drugu web lokaciju koja sadrži portfolio autora sajta.

2.2 Mapa sajta

```
<?xml version = "1.0" encoding = "utf-8"?>
<urlset xmlns = "http://www.sitemaps.org/schemas/sitemap/0.9">

        <changefreq>weekly</changefreq>
        <priority>1</priority>
    </url>
</urlset>
```

2.3 Slike stranica i opisi funkcionalnosti

2.3.1 index.html

Po ulasku na web stranicu pojavjuje se kratka animacija tokom čijeg trajanja korisnik nije u mogućnosti da pregleda sadržaj stranice u celosti, kao ni da vrši određene zahteve.

Zaglavlje stranice dinamički je kreirano uz dodatne funkcionalnosti prilikom scroll-ovanja web stranice: promena stanja aktivnog linka kada se dođe do odgovarajuće glavne sekcije, kao i promena izgleda samog zaglavlja – logo prelazi u horizontalni položaj i umanjuje se, zaglavlje dobija pozadinsku boju. Po povratku na vrh stranice, zaglavlje se vraća u prvobitan izgled. Za rezolucije manje od 992px pojavljuje se ekspandirajući meni, koji na klik na taster u gornjem desnom uglu prikazuje stavke navigacionog menija preko celog ekrana uređaja. Nakon prikazivanja liste stavki menija, klikom na isti taster moguće je zatvoriti listu.

Dinamički kreirani elementi u slider-u se automatski menjaju na 5 sekundi, a takođe postoje tasteri da se prikaže prethodni, kao i naredni element. Automatsko menjanje se zaustavlja kada korisnik pozicionira kursor miša u okviru aktivnog elementa. Prilikom promene aktivnog elementa, njegov indikator postaje tamniji u odnosu na ostale.

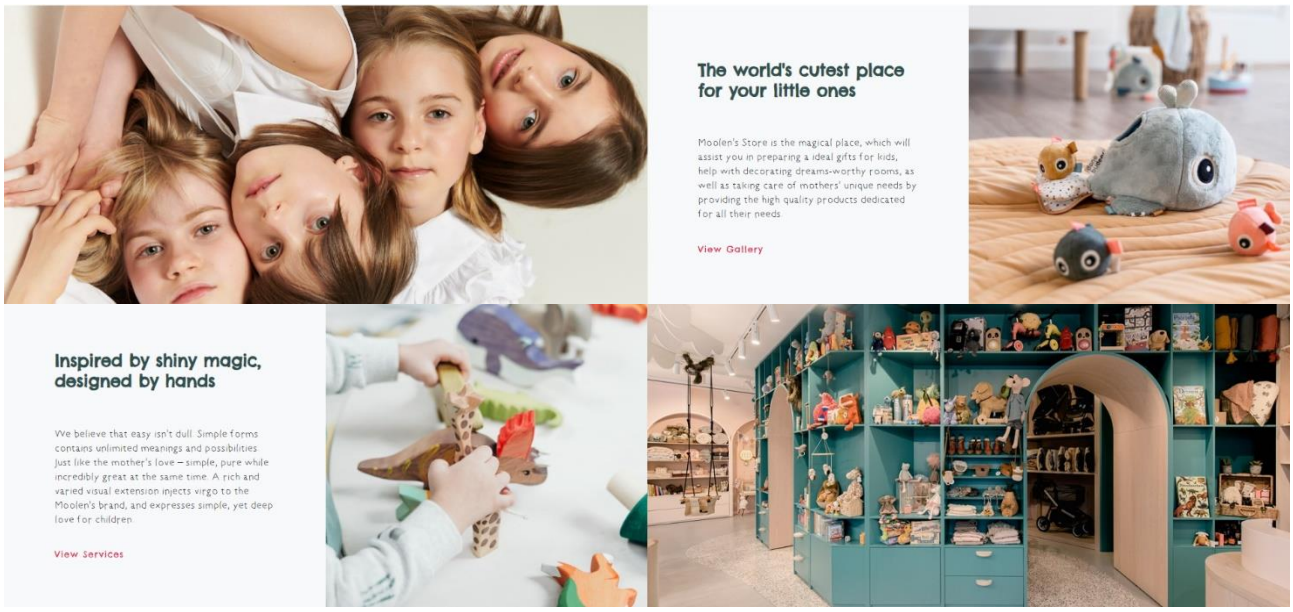
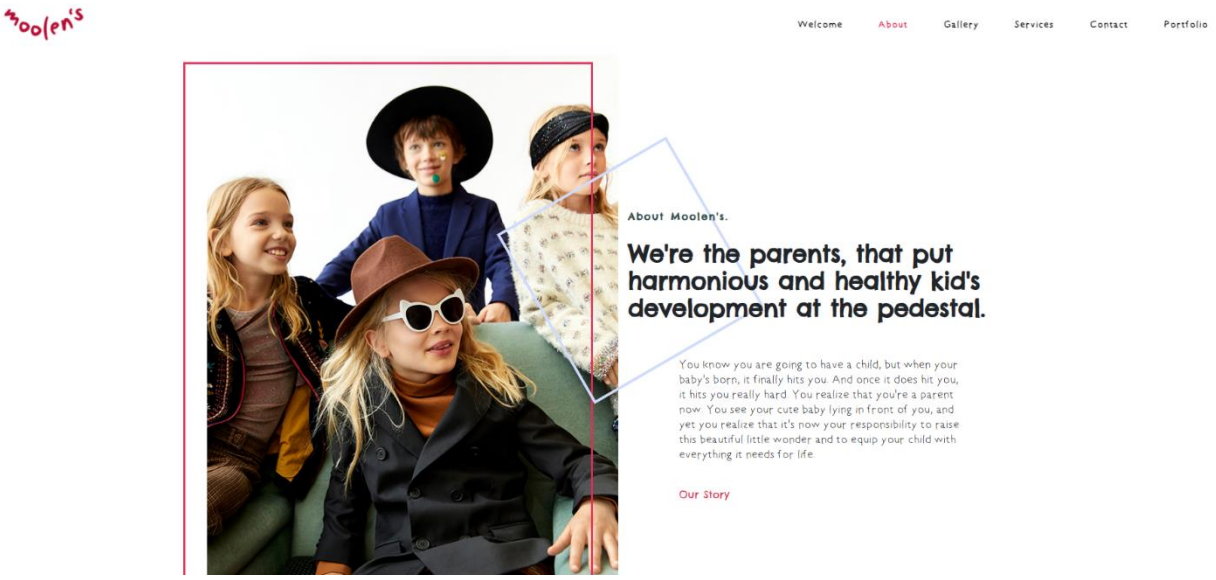
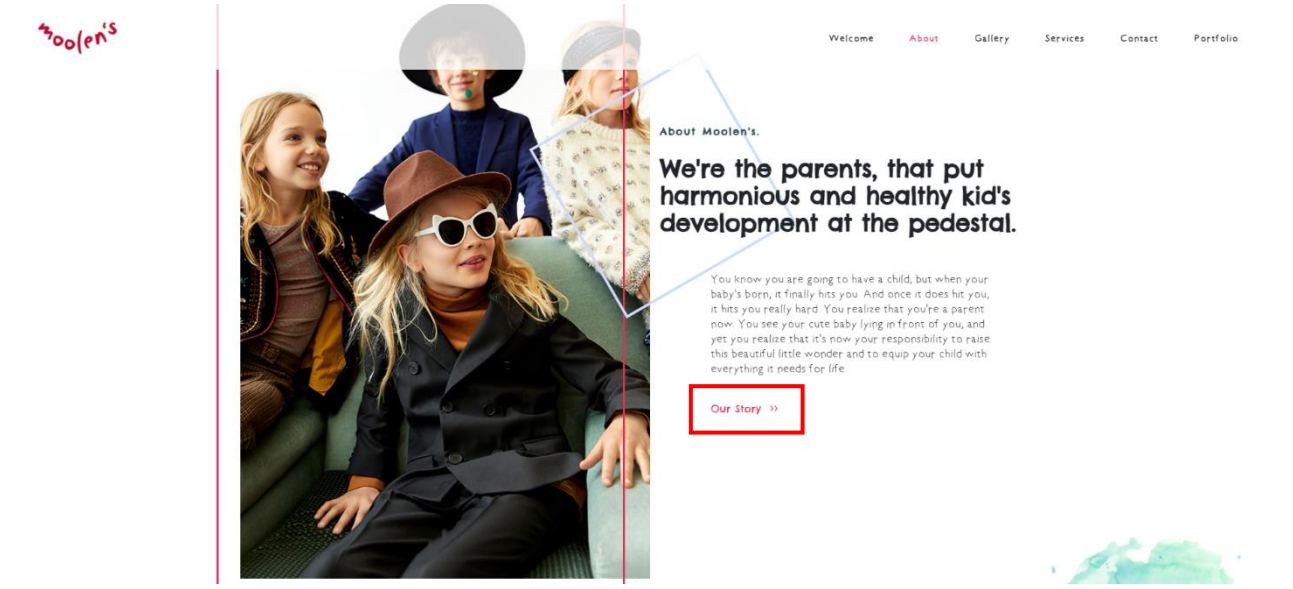
A large number of kids grew up with Moolen's, due to their special, modern design and unquestionable quality, at very affordable prices.

U narenoj sekciji svakom elementu sa pozadinskom slikom dodeljena je jednostacna animacija napisana u jQuery-ju.



Klikom na taster „Our Story“ prikazuje se modal u kojem se nalaze informacije o samom brendu Moolen's. Otvoren modal moguće je zatvoriti klikom na ikonicu ✕ u gornjem desnom uglu.





Dinamički kreirana galerija slika u kojoj je po default-u proširen prvi element i prikazan njegov sadržaj, dok su ostali elementi skupljeni. Svakom elementu je dodeljena mogućnost promene prelaksom kursora miša preko samog elementa, kada on postaje aktivni (prošireni) element. Onog trenutka kada kursor miša izađe iz okvira sekcije „Galley", sekcija se vraća u svoj podrazumevani izgled (prvi element proširen, dok su ostali skupljeni). Funkcionalnost je prilagođena za dve prelomne tačke: (min-width: 900px) i (max-width: 899px).

01 THE WORLD'S CUTEST PLACE
In order to create a lovely space friendly for everyone, regardless of age, most of the store's furniture were designed to be oval, organic shape. In the central part a sort of arcade labyrinth emerged, where chosen trolley can be easily taken for a little test drive. A full array of them are on the display in the backend wall of the local, set on spacious, regular shelf. A foresaid roundness can also be spotted in the central's island made wholly out of terrazzo) form resembling parquetum.
